Introducing the CCH[™] Acid Plus Feeder System!

If you are using **CCH**[™] calcium hypochlorite feeders, then the **CCH**[™] Acid Plus feeder system can help maintain a complete dry chemical package for sanitization and pH control (down).

The CCH[™] Acid Plus Feeder provides:

- » Reliable pH balancing
- » Features a compact rugged roto molded body
- » Integrates inlet flow solenoid control for reliable operation
- » Shares booster and venturi loop
- » Custom color to distinguish between other feeders
- » Acid introduced to venturi removes scale and minimizes maintenance
- » Back flow prevention

The CCH[™] pH Down +4 is a proprietary formulation with the following benefits:

- » Dry acid chemical is easier to handle and transport than CO2 and muriatic acid
- » Requires NO double containment
- » Ensures no liquid spills
- » Has little to no odor
- » Dry acid solution is 100% soluble
- » Acid solution is not under pressure
- » Less hazardous than highly concentrated liquid
- » 10lbs is equivalent to 1 gallon of 32% (20 Baumé) muriatic acid

The **CCH**^{••} Acid Plus feeder system is low maintenance, easy to install and has a small footprint making it a great addition to your pool chlorination treatment plan.

4-in-1 product lowers pH, continuously removes phosphate, clarifies and prevents stains and scale!

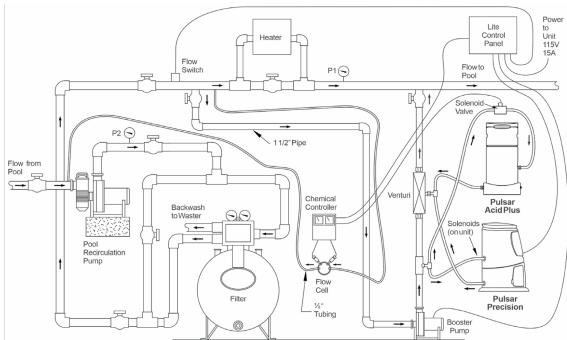

System Capacity	,	
Volume	60 lbs.	27.21 kg
System Capacity	,	
Width	60 lbs.	27.21 kg
Height	60 lbs.	27.21 kg
Weight (empty)	60 lbs.	27.21 kg
Requirements		

Use with

CCH[°] pH Down +4 Granular

CCH[™] Acid Plus

Installation:

- 1. Use schematic for installation guide
- 2. Install booster pump and venturi Loop in accordance with the feeder I&O manual
- 3. Install one ½" Tee at the ½" NPT outlet above the booster pump discharge
- 4. Install the second $\frac{1}{2}$ " Tee at the $\frac{1}{2}$ " venturi suction
- 5. Connect four parker tubing connectors on the Tee branches at the feeder inlet and venuri suction
- 6. Plug in the feed solenoid valve to the chemical controller pH down output for pH control automation

WARNING – Always use personal protective equipment including but not limited to chemical gloves, safety goggles and a full-face mask when handling acid to protect from liquid and vapor. Refer to the Safety Data Sheets that are included with the acid for additional information and precautions regarding the proper handling of acid.

If using the same booster pump and Venturi as the precision feeder as shown in the schematic, set booster pump to Always On by setting dip switch 4 to OFF in the control box.

Parts List			
escription		Part #	
Dry Acid Feeder, Tees (Qty 2), nipples (Qty 4), ½" parker fastNTights P8MC8 (Qty 2),	1	73350	
1HP booster pump, 1 ½" Venturi PVDF with unions, ½" OD PE tubing 20 Ft, ½" x ½" female connector, ½" FNPT x ½" tubing connector, ½" FNPT x NPT ball valve (outlet), 1 ½" x 12" PVC nipple,		79830	
½" FNPT sch 80	2	71912	
½" NPT x 1 ½" fully threaded	4	71916	
Red lid for CCH [™] acid feeder	1	73298	
Basic SDCH ORP Kit w/3 meter extension	1	73119	
	1HP booster pump, 1 ½" Venturi PVDF with unions, ½" OD PE tubing 20 Ft, ½" x ½" female connector, ½" FNPT x ½" tubing connector, ½" FNPT x NPT ball valve (outlet), 1 ½" x 12" PVC nipple, ½" FNPT sch 80 ½" NPT x 1 ½" fully threaded Red lid for CCH" acid feeder	Dry Acid Feeder, Tees (Qty 2), nipples (Qty 4), ½" parker fastNTights P8MC8 (Qty 2), 1 1HP booster pump, 1 ½" Venturi PVDF with unions, ½" OD PE tubing 20 Ft, ½" x ½" female connector, ½" FNPT x ½" 1 ½" FNPT sch 80 2 ½" NPT x 1 ½" fully threaded 4 Red lid for CCH [™] acid feeder 1
